Did you know that so far we have allowed:

- \*The world to own 27,000 atomic bombs?
- \*Australia to export 8,954 tons of uranium in 2006?
- \*Japan to start producing 8 tons of plutonium  
per year from unclear waste?

(Enough to make 1,000 Nagasaki atomic bombs  
which killed 74,000 men, women and children instantly)

**A Whole new perspective!**
